

## **JFrog Signs Agreement with AWS to Help Enterprises Unlock Business Value from Their Software Supply Chains**

*The new strategic collaboration agreement (SCA) allows enterprise customers to cost-effectively scale their DevSecOps and AI-driven software solutions in the cloud*

**Sunnyvale, Calif. – February 12, 2025** — [JFrog Ltd.](#) (“JFrog”) (Nasdaq: FROG), the Liquid Software company and creators of the [JFrog Software Supply Chain Platform](#), today announced it has signed a strategic collaboration agreement (SCA) with Amazon Web Services (AWS). The agreement empowers enterprise customers to swiftly migrate workloads to AWS to maximize the value of their cloud-based, software supply chain investments.

“Our expanded collaboration with AWS is a critical component for helping our customers to achieve their cloud-native initiatives using robust, flexible, and secure software delivery infrastructure,” said Tali Notman, CRO, JFrog. “Strengthening our collaboration with AWS allows us to deliver a unified, secure, and reliable cloud-native platform that empowers our customers to bring their applications to market faster, with greater confidence and improved commercial terms.”

JFrog’s agreement with AWS will directly benefit customers, delivering accelerated cloud migration and increased resources to help customers leverage AWS Marketplace for seamless procurement.

Fortra, a leading provider of cybersecurity and automation solutions, leverages the JFrog Platform on AWS to enhance their developer experience and optimize their software development lifecycle. By utilizing JFrog’s comprehensive DevOps capabilities on AWS, Fortra ensures high-performance, secure, and scalable infrastructure management. This has allowed Fortra to focus on innovating without the constant need to manage underlying infrastructure, enhancing productivity and efficiency across its development teams.

“We at Fortra have greatly benefited from the implementation of the JFrog Platform on AWS. The seamless integration and robust features of JFrog, combined with the reliable and scalable infrastructure of AWS, have significantly optimized our developer experience,” said Jody Dahl, VP of Research and Development, Fortra. “The comprehensive security measures and cloud-native DevSecOps capabilities provided by JFrog ensure our development processes are secure and compliant. Additionally, procuring JFrog through AWS Marketplace has streamlined the acquisition process, allowing us to quickly deploy and manage our solutions with ease. We are

excited about the deepening collaboration between JFrog and AWS, and the tremendous value it will bring to customers like Fortra."
